

TracLux® Light Carrier Technology

TracLux®

Brilliant new ways to light the surgical site.

SUNOPTIC
OEM TECHNOLOGIES

Light Your Way to Profits

TracLux® is a new, patented light carrier technology that delivers brighter and more concentrated pure white light to difficult to illuminate operative fields. TracLux® Technology outperforms competitive products both in light output and convenience.

This highly versatile and modular system, available on diverse platforms and configurations, works with most light sources. Our light carriers simply plug into our TracLux® optimized fiber optic cables and are ready to use right away. We can also customize any of our products to suit your specific needs or requirements.

Limitless Applications

TracLux® products are ideal for use in a wide variety of surgical and clinical applications. Call us today and see how TracLux® Technology can become a profitable and integral part of your product portfolio.
